

Requirements:

1. Java SE (jdk 1.8 or above).

Execution Instructions:

1. Open command prompt and go to folder "DB Project 1".

Note: I have already compiled the .java files and upload the .class files. So, no need to compile the java files again.

2. Execute command: `java <class_name> <input_number>`
Eg: `java Rigorous2PLWithWoundWait 1` (press enter)
`java Rigorous2PLWithWoundWait 2` (press enter)
3. Output will be printed to console.
